

Quantum – The Universe Machine

Theatre performance / stage comic

Quantum physics is celebrating its 100th anniversary and continues to inspire discussions and science fiction. Teleportation, Schrödinger's cat and parallel worlds take center stage in "Quantum – The Universe Machine", a new stage comic by the collective half past selber schuld.

Through episodic and poetic scenes, the performance connects physics with technology, politics, society and human behavior. The piece was developed in close collaboration with the Institute for Physics Education at the University of Münster.

After the performance, there will be the opportunity to take part in a discussion with the artists or to end the evening together with a drink.

WHEN: Saturday, 28 February, 7.30 – 9 pm

WHERE: Forum Freies Theater (FFT), Konrad-Adenauer-Platz 1,
40210 Düsseldorf

LANGUAGE: English with German subtitles

COST: 4€

Please register at kultur@stw-d.de.

We're looking forward to an exciting evening of science, theatre and humor!
